PROFESSIONAL SUMMARY

Big Data Analytics learner at C-DAC with hands-on project experience in data analysis, data cleaning, ETL workflows, data modeling, KPI reporting, and interactive dashboards using Python, SQL, Power BI, Tableau, and Excel. Working knowledge of MySQL, MongoDB, and PostgreSQL, with familiarity in Snowflake, data warehouse, and data lake concepts. Currently learning Generative AI (LLMs, RAG) to build data-driven applications. Strong analytical and problem-solving skills.

TECHNICAL SKILLS

Programming: Python, SQL, R
Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis
Data Visualization & BI: Power BI, Tableau, Excel, Dashboards, KPI Reporting, Matplotlib, Seaborn
Databases: MySQL, PostgreSQL, MongoDB, Snowflake, Stored Procedures, Window Functions, CTEs
Data Warehousing & ETL: Data Warehouse, Data Lake, ETL Workflows, Data Modeling, Snowflake
Big Data & Cloud: Hadoop, AWS Cloud Foundations
Machine Learning & AI: Scikit-learn, Machine Learning, Generative AI, LLMs, Prompt Engineering, RAG, Embeddings, Vector Databases
Tools: Git, GitHub, Linux

PROJECTS

Business Insights | *Power BI, DAX, MySQL, Excel* GitHub

- Built an end-to-end enterprise BI solution consolidating MySQL databases and Excel feeds into a Power BI data model (snowflake schema) with 50+ DAX measures.
- Designed role-based dashboards for Finance, Sales, Marketing, Supply Chain, and Executive views, including a dynamic P&L, targets vs. last-year benchmarking, and market share analysis.
- Wrote MySQL stored procedures, triggers, CTEs, and window functions for fiscal-year reporting, top-performer ranking, and forecast accuracy analysis.

E-Commerce Sales Analysis Dashboard | *Python, SQL, Excel, Power BI* GitHub

- Processed and transformed raw e-commerce transaction data using Python and SQL to build an analysis-ready dataset.
- Analyzed revenue trends, product performance, and customer behavior to derive key business KPIs.
- Designed interactive Power BI dashboards to visualize sales performance and category trends.

Zomato Restaurant Data Analysis | *Python, Pandas, SQL, Tableau* GitHub

- Analyzed restaurant datasets using Pandas, NumPy, Matplotlib, and Seaborn to identify pricing, rating, and cuisine trends.
- Wrote SQL queries to clean and aggregate data for location-based trend analysis.
- Built interactive Tableau dashboards with filters for city, cuisine, rating, and price category.

EDUCATION

B.Tech, Computer Science and Data Science — Dr. APJ Abdul Kalam Technical University 2022 – 2026
Senior Secondary (12th), CBSE — Rapid Global School 2022

EXPERIENCE

Data Science Intern — Oasis Infobyte Internship

- Applied Python, Pandas, and NumPy to clean, explore, and analyze datasets and present data-driven findings.

Data Analytics Virtual Intern — Deloitte (Forage) Virtual Internship

- Completed a job simulation in data analytics, analyzing datasets and translating results into business insights.

Data Visualization Virtual Experience — Tata Group (Forage) Virtual Experience

- Completed a job simulation in data visualization, converting business data into clear visual insights for decision-making.

CERTIFICATIONS

- Data Analytics — CodeWithHarry
- Data Science — Oasis Infobyte
- Data Analytics Virtual Internship — Deloitte (Forage)
- Data Visualization Virtual Experience — Tata Group (Forage)
